

# Cypress Street Outfall Regional Stormwater Improvements Design-Build Project

Budgeted Construction Cost: \$30M | Construction Start: Spring 2019 | Anticipated Duration: 2 Years

## Project Highlights

- ❖ Design and construction of approximately 7,300 linear feet of box culvert, laterals, inlets, and interconnections to the existing stormwater system
- ❖ Incorporation of “green” solutions to the proposed stormwater infrastructure
- ❖ Co funded by the City of Tampa and the Southwest Florida Water Management District (SWFWMD)

## Project Benefits

- ❖ Reduce frequent flooding in residential and commercial areas of W. Cass Street, N. Rome Avenue, W. Gray Street, and surrounding areas
- ❖ Enhance pedestrian safety and mobility improvements
- ❖ Upgrade signalization
- ❖ Reduce pollutant loading on the Hillsborough River and Hillsborough Bay
